

# Amphibious ATV 8x8

Need to transport personnel or equipment across boggy terrain, deep mud, steep hills, streams, or open water? The **Argo Aurora 950 8x8** is the premier amphibious Extreme Terrain Vehicle (XTV) designed to conquer environments that stop conventional ATVs and UTVs in their tracks. Whether for commercial, agricultural, or adventurous surveying work, this machine is built to get you there and back. 8-wheel drive with low-pressure 25-inch tires provides maximum traction in mud, snow, rivers and marshland.
