

All Terrain Tipping Trailer

This flatbed is a sturdy ATV trailer with a gross carrying capacity of 1200kgs with wheels fitted underneath the bed to provide easy loading onto a practical trailer with a good size load area. The walking axle provides an excellent ride and superb towing characteristics whilst decreasing the impact of the ground. The trailer is fitted with heavy duty axles and all terrain knobbly tyres providing a reliable and robust combination. Ideal for placing and moving stone on scour protection jobs, paired with our modular pontoons for using in rivers.
