

# Tracked Carrier Dollys

Our **Tracked Carrier Dolly** is designed to boost both **capacity** and **safety** on site when used alongside one of our electric, remote controlled Tracked Carriers to make transporting heavy or oversized loads even easier. With a **1,000kg capacity**, the **Dolly** adds to the payload of the Tracked Carrier, while enhancing stability by creating **ground contact at both ends of the load** – reducing the need to balance everything on a single unit. The **manual steering handle** allows up to **45° movement left or right**, offering precise control and exceptional manoeuvrability, especially in tight or challenging spaces. Large **heavy duty**, pneumatic wheels allow use on unfinished ground and **reduce ground pressure** on sensitive floors. Rubber contact blocks help **keep the load positioned accurately** when strapped down.

## General

<b>Name</b>	Rebel Tracked Carrier Dolly
<b>Length</b>	600mm
<b>Width</b>	750mm
<b>Capacity</b>	1000kg
<b>Qty Available</b>	2
